Hello, Folks:

We are very pleased to send you this, our new fall catalog, and we are certain you will find just what you are looking for. Of course, we do not list the number of varieties we do in our big spring catalog, but, after all there is a limit to the number of items that can be safely fall-planted.

You want results, and we want you to have them. That is why we have used extra care in selecting the items we are listing for fall planting. You can select any item with the satisfaction of knowing it is the kind of nursery stock or seed that can be safely fall-planted.

Thanking you for any order you might favor us with, I remain

Geo. W. Gurney
President

ABOUT FALL PLANTING

Plant all perennial flowers in the fall just as you would in the spring. Do not mound dirt over them but be sure and mulch them after the ground freezes. Put good mulch over your bulb bed, using coarse litter or straw manure. Put a mound of dirt around your bramble fruits as soon as they are planted to prevent heaving from alternate thawing and freezing, and remove this mound early next spring after growth starts.

You can fall plant as long as you can work the ground even if you have to break a frozen top crust several inches thick. Be sure you water thoroughly if the ground is dry, and do not expect most fall-planted stock to show any signs of growth this season as it has gone into a dormant period and will not start until next spring.

Write us if you have growing problems. We are always glad to help you in every way that we can.

FREE GIFT

With every nursery order we receive, it is our custom and pleasure to include with your order a valuable free gift. You will be surprised and pleased when you receive it, and it's our way of saying "thank you" for the fine order.

Gurney's Nursery Stock is GUARANTEED

We guarantee all our nursery stock to be state inspected, free from disease, true to name, and first class in every way.

Examine the nursery stock carefully when you receive it. If you are not pleased with it in every way, return it promptly at our expense and we will replace it at once, or refund your money in full, whichever you prefer.

After you have planted it, if it fails to grow owing to weather conditions or other factors over which we have no control, we will replace losses once at half price the following season. If you notify us not later than Aug. 1, 1955. Accompany your report with a remittance of one-half the original purchase price.

A GURNEY LAWN Is Easy to Make

Preparation of the ground is important. First, plow 1 or 2 spade deep. Level off the area to be planted and rake to remove sticks, trash, stones, or lumps.

After raking smooth—Roll the lawn thoroughly. This allows you to plant the seed more evenly, plus providing a firmer seed bed.

After rolling—Sow the seed, gen-

erally using 1 lb. of lawn seed to every 225 sq. ft.

After seeding—Rake carefully to work the seed slightly into the soil.

After this raking—Roll your lawn, using a roller or packer. This is important.

Keep it well-watered (each day) for the next 2 or 3 weeks. Moisture is necessary for proper germination.

FALL SEED FOR A WEED FREE LAWN

By seeding in August or September you eliminate a good share of your weeds. You'll have an established lawn by the time the snow flies. The weed crop in the spring won't be able to take over.

We harvest our own Blue Grass and it is absolutely "tops" in quality — northern-grown seed. Remember to seed early in the fall for best results.

All Gurney's Lawn Seed Is Carefully Tested

You cannot buy finer grass seed than we are offering here

at Gurney's. All of it is fresh, new crop seed that has been carefully tested to assure you of a beautiful lawn. It is good heavy seed and that means it is weed free seed. You get the best—far less—when you order from Gurney's.

New "GREEN CARPET" Lawn Mixture

A fine lawn mixture to give quick results and a permanent lawn. Kentucky Blue Grass, Fescue and Rye Grasses, blended for years of beauty. An all-purpose, reasonably priced mixture. 1 lb. 89c; 3 lbs. 2.19; 5 lbs. 3.39; 10 lbs. 6.39, ppd.

Gurney's DAFFODILS

If you want to be sure of blooms, and want a showing as good as any professional's, plant Daffodils. They are sure to grow in spite of adversity, never giving any trouble, and each spring they produce healthy, gay and colorful blooms. You can depend upon them.

You shouldn't try to achieve formal effects with them. Don't put them in straight rows or squared beds. They look best along the edge of the shrubbery, or strewn across the lawn. Lots of people plant Daffodils by taking the bulbs in handfuls and scattering them rather carelessly across the lawn or a grassy slope. Then they plant the bulbs 5 inches deep wherever they fall. They come up then as a natural part of the landscape, as if man had nothing to do with it. Try it and see for yourself.

To keep them blooming year after year, dig them up about every third year, separate them, and plant them again. Do this in July or early August.

We chose the following Daffodils for you because they not only are some of the best but give you a good range of colors, shapes and sizes. All of them are imported by us, for you, from Holland.

B6610—KING ALFRED. Probably the most popular of all Daffodils, and certainly one of the best. Make a golden yellow flower 4 to 5 inches across with a trumpet 2 inches long. Very good for forcing too. 3 for 50c; 6 for 85c; 12 for 1.49, postpaid.

B6615—ORANGE GLOW. Another large one, usually about 4½ inches across. Has a heavily frilled, deep orange cup. 3 for 50c; 6 for 85c; 12 for 1.49, postpaid.

B6602—CHEERFULNESS. A new one that will delight you. Has several blossoms on each stem, each blossom double, and very sweet scented. Also forces well. 3 for 50c; 6 for 85c; 12 for 1.49, postpaid.

B6613—MRS. ERNEST H. KRELAGE. Like King Alfred excepting the color is ivory white. 3 for 65c; 6 for 1.10; 12 for 1.98, postpaid.

B6622—REMBRANDT. Large pale golden-yellow flowers of perfect form. One of the best and very attractive. 3 for 60c; 6 for 90c; 12 for 1.75, postpaid.

B6609—INDIAN CHIEF. A strikingly beautiful new double Daffodil that you will like. Illustrated at left. 3 for 50c; 6 for 98c; 12 for 1.75, postpaid.

B6607—FORTUNE. A new beauty from Holland. Deep scarlet-orange cup and bright golden yellow petals. One of the best large cup varieties. 3 for 60c; 6 for 98c; 12 for 1.75, postpaid.

SUPER DAFFODIL OFFER

HYACINTHS

Extra hardy, easy-to-grow flowers of colorful beauty and having a sweet, delicate scent.

Like Daffodils, Hyacinths are very hardy and easy to grow, requiring very little attention. In fact, they are very good planted with Daffodils. But unlike Daffodils, they usually are planted more formally—in rows or beds—although they may be handled informally. They usually get about 12" high, and are especially good as a front for Tulips, or may be combined with the lower-growing flowers such as Grape Hyacinth or Pansies. Hyacinths like a rich, well-drained soil and are best planted about 6" deep and 6 to 9" apart.

Hyacinths also are a favorite for in-

door forcing. Special glasses are made for this purpose, but a Mason jar will do. Just place the bulb on the top rim of the glass or jar and fill the jar with water until it touches the root base. Keep in a cool, dark place, adding water (but not changing it) as necessary. When the bulb gets about 4 inches of top growth (this usually takes about 8 weeks) place in a north window and they will bloom beautifully. This forcing should be started in midwinter—December, January or early February.

Hyacinth Prices: 3 for 69c; 6 for 1.29; 12 for 2.29; 25 for 4.29, postpaid.

B6502—BISMARCK. A light sky-blue with broad, well-formed spikes on strong stems. Excellent for early forcing too.

B6530—PINK PEARL. A lovely bright pink—really a rose-pink with lighter edges. Has a large spike of fine bells.

B6504—CITY OF HAARLEM. The best

yellow Hyacinth. Has well-formed trusses of golden yellow flowers.

B6518—KING OF THE BLUES. Deep glossy blue with well-formed large spike. A real beauty that everyone likes.

B6520—LA VICTOIRE. A brilliant carmine-rose that blooms very early. Has large, well-filled spikes. A very showy variety ideal for adding bright color to your garden.

B6522—L'INNOCENCE. This is the best and most popular white Hyacinth. Has broad, well-shaped bells that are pure white. Blooms early.

LILIES

New CENTIFOLIUM HYBRID

85020—These are magnificent pure white hybrids from the West Coast, and far outshine the Regal Lily in every respect. They are the result of over 15 years of hybridizing, and the crossing of dozens of lily species. The plants have an abundance of rich green foliage and each year add more and more flowers to their clusters—sometimes great clusters of 50 or more huge blossoms crown the top of a flowering stem.

The flowers are trumpet-shaped, as you can see by the photograph at the far left, being pure white inside with the reverse of the petals often pink, emerald green, or brown, making some beautiful color contrasts. Very hardy and, because of their deep root system, stand severe drought well. Plant 6 inches deep. 49c ea.; 3 for 1.25, ppd.

Here are some of the very good popular lilies, plus some outstanding new ones that are easier to grow and more beautiful than any you have ever seen before. All lilies listed here can be planted this fall. If you live where the ground freezes, mulch with 4" of coarse straw after (not before) the ground is frozen.

Madonna Lily Improved Cascade Strain

85023—The result of years of work by a French hybridist, this new Cascade strain has tremendous vigor and surpasses all other Madonnas not only in height of stalk and size of flowers but also in resistance to the lily disease, Botrytis. Plant not over 2 to 3" deep. Must be fall planted. 59c each; 3 for 1.49.

3 Outstanding NEW Hybrid LILIES

The three lilies described below are the result of over 20 years of hybridizing by Mr. Carlton Yezzer of Oregon. Lily experts already have recognized them as three of the world's best and most beautiful strains of lilies.

85000—AURELIAN HYBRID. These are wide, flaring trumpet lilies six inches and more across in beautiful color combinations, including sunburst effects. Tall, sturdy plants are very easy to grow; live a long time; are entirely hardy. Plant 6" deep. 1.69 each; 3 for 4.98, ppd.

85024—PINK TRUMPET. Long trumpet lilies that actually are a beautiful shell pink. Also very hardy and easy to grow but the lilies are apt to fade in hot, direct sunlight so give best results in partial shade. Or screen some at time of blooming. Plant 6" deep. 2.75, ppd.

SPECIAL LILY COLLECTION

83452X—1 Coral, 1 Regal, 1 Flame, 1 Pink Show, 1 new Centifolium Hybrid—all 5 for only 1.89, ppd.
